AEGIS LAUNCHES A BRAND NEW WEBSITE

CHESTERFIELD, MO, OCTOBER 18, 2007: Aegis Metal Framing, LLC launches a brand new website aimed to assist building professionals.

The website was redesigned with the entire building team in mind to provide valuable tools such as case studies, interactive detail library, and automated specification writing. Architects, engineers, contractors and fabricators can find useful tools for the complete building process, from estimating to final product. These tools will help drive out costs, reduce labor, and achieve attractive, innovative designs.

The main navigation is an easy to use tool bar to contact Aegis, locate a fabricator, obtain "Building Green with Aegis" information, or earn AIA/CES education credits through one of our accredited classes. Within the main navigation are quick links allowing the user to jump to detailed information pertaining to variety of topics within each building professional's job specific duties as outlined below.

Architect/Engineer:

Loaded with tools for the Design Professional: Case studies, product information, Specification Creator and our latest interactive detail

~ MORE ~

library, complete with AutoCAD and PDF downloads. Plus we offer AIA/CES education units via online or onsite presentations.

- Specification Creator for instant CSI formatted specifications.
- Interactive Detail Library for easy viewing and detail downloads.
- Educational tools.

Contractors:

Contractors can locate a fabricator from our North American network, watch an installation video, obtain an installation guide, or learn more about cold-formed metal framing products.

- Locate one of our fabricators through an interactive map.
- Watch our installation video either online or request a CD.
- Learn more about cold formed metal framing.

Fabricators:

Fabricators can learn about cold-formed metal framing products, review our interactive detail library, or watch an installation video.

- Interactive detail library.
- Request engineering assistance and/or technical support.
- Learn about our latest software offerings

In addition, Aegis Metal Framing has created an interactive detail library to assist the building team in selecting the optimum connection for a broad array of building conditions. The interactive tool allows building professionals to view products, fasteners, and assemblies in both AutoCAD and PDF formats.

- Realistic images to view a wide range of products and different connection types available.
- Organized by bearing type and/or connection product.
- Hover capabilities for each image allow for quick review of product prior to download of needed format.

Aegis Metal Framing, LLC markets a complete line of computer designed, factory-built, cold-formed steel roof, floor and wall framing systems to the commercial/institutional and residential construction markets. Structural elements are designed and pre-fabricated by a network of authorized Aegis fabricators. For more information, please visit our website at www.aegismetallframing.com or contact our toll free number at 1-866-902-3447.
